

# Comfrey Tonic

Flowering and fruiting liquid fertiliser.  
**100% plant-origin**

## Characteristics

The well-known perennial, Comfrey, has been treasured by generations of gardeners and growers as a natural source of nutrients for the garden. This deep-rooting plant is able to draw up an impressive range of macro and micro elements which are inaccessible to most plants, and store them within its abundant foliage.

B-actif Comfrey Tonic is a liquid extract of this foliage; a natural concentration of nitrogen, potassium, and phosphorus, vitamins, trace elements and hormone-like substances which are instantly available to plants and soil microbe populations. Importantly, thanks to our process of drying, rehydration and filtering, B-actif Comfrey Tonic is the only concentrate of its kind which is non-smelly, and the first which may be used indoors without fear.

**An excellent natural stimulant,  
directly available to plants**

## Advantages

The manufacturing process of B-actif Comfrey Tonic is gentle and completely natural resulting in an harmonious concentration of essential elements. Beneficial for the natural environment and easy and safe to use, Comfrey Tonic has been shown to:

- accelerate seed germination
- stimulate soil microbial life
- induce strong flowering and fruiting, and
- optimise breakdown and nutritional potential of added organic matter

**Les résultats sont étonnants,  
que se soit en terme de nombre ou  
de longévité de floraison**

## Utilisation

Arrosage au pied à un taux de dilution de 1 à 1,5 litre de tonique pour 100 litres d'eau, 1 à 2 fois par mois assurera une croissance harmonieuse de vos plantes et massifs et diminuera d'autant l'emploi des produits habituels de traitement.

Bien remuer avant application.

Plantes  
d'intérieur

Semis/  
transplantation

Plantes  
en suspension

Fleurs  
et massifs

## Composition

65% comfrey extract		
35% hydrolysed vegetable polypeptides		
4% dry matter		
N 1	Fe +++	Zn +++
P <sub>2</sub> O <sub>5</sub> <1	Cu +++	Mn +++
K <sub>2</sub> O 3	Ca +++	B +++
	Xanthophylles +++	
	Vitamins +++	

## Packaging

1 and 10 litre containers

Norm NFU 42001

Usable in organic production  
conforming to annex II of regulation CEE  
No.2092/91, amended 24/06/1991
