

2-in-1 Moss Killer & Lawn Verdifier

100% natural • 100% biodegradable

Characteristics:

Highly assimilable soluble Iron-based liquid fertiliser. Naturally rich in algal iron poly-complexes, B-actif Moss Killer & Lawn Verdifier rapidly eliminates mosses in lawns whilst, simultaneously, supplying grass matrixes with a host of minerals, trace elements and hormone-like molecules.

Rich in oligo-saccharides

Advantages:

On moss: B-actif Moss Killer & Lawn Verdifier rapidly eliminates bryophytes in lawns and turfs by:

- supplying a highly assimilable algal iron poly-complex which destroys the chlorophyllic enzymatic system of mosses, causing asphyxiation and death, and
- causing dehydration through over stimulation of the hydro-stress phyto-resistance function.

On turf: the algal iron poly-complex and comfrey and seaweed extracts visibly improve lawn quality by:

- stimulating photosynthesis of *Graminaceae* and optimising chlorophyll content in leaves,
- acting on the osmotic regulation function of *Graminaceae* for improved uptake of water and minerals, thus increasing dry matter content and hardness, and
- providing a wealth of directly available, plant-derived macro- and micro-elements (minerals, vitamins, trace elements, cytokinin-like growth promoters).

Source of easily absorbed bivalent organic iron compounds, which instantly reduce nitrate needs

Usage:

	Pure product	Quantity of water	Surface area of lawn
Watering can	100 ml	3 litres	2-3 m ²
	500 ml	15 litres	10-15 m ²
	1 litre	30 litres	25 m ²
Sprayer	100 ml	3 litres	10-15 m ²
	500 ml	15 litres	50-60 m ²
	1 litre	30 litres	100-120 m ²
	5 litres	150 litres	500-600 m ²

Lawns

Composition:

Water-soluble iron (Fe): 5%
Water-soluble magnesium oxide (MgO): 2%
Comfrey extract
Seaweed extract
PH-2.3
Density at 20°C-1.27

Storage and packaging:

Do not store in conditions less than 5°C (risk of partial crystallisation).
Fertiliser rich in trace elements, use only when necessary.
1, 2.5, 5, 10, 20, 200, 1000-litre containers.
